WE ARE CLIMBING STEPS

Empowering Movement, Supporting Success

At Climbing Steps, Inc., we don't just manufacture equipment; we build the tools for independence. Our mission is to bridge the gap between mobility challenges and active living through high-performance medical and material handling solutions.

We recognize that our dealers are the vital link to the community. That is why we combine cutting-edge technology with premium materials to create products that are as reliable for the provider as they are for the user. By integrating years of industry expertise with direct feedback from the field, we ensure every product we ship is engineered for safety and designed for dignity. Together, we are helping your clients navigate the steps of life with confidence.

MOBILE STAIRLIFT

Unrestricted Access. Anywhere, Anytime.

Mobile Stairlift is revolutionizing the way we navigate homes and our communities. By offering a full line of portable stairlift alternatives, we empower dealers to serve the “underserved” mobility market and those who cannot or choose not to install permanent stairlifts or wheelchair ramps.

For the modern dealer, our line of Mobile Stairlifts provides a versatile tool for growth. We offer a solution for renters who cannot modify their homes, travelers who need a portable option, and families seeking a cost-effective alternative to traditional installed stairlifts. Whether it’s a primary home solution or a secondary “add-on” for outdoor use, our mobile stairlifts ensure that your customers never have to compromise on safety or independence.

THE MOBILE STAIRLIFT GENESIS ECO

The Genesis ECO is the ideal entry-level mobile stairlift, delivering safe, powered stair travel at an accessible price point without the complexity or cost of traditional installed stairlifts. It provides dependable performance for everyday home use, recovery needs, and temporary mobility situations.

Best Entry-Level Option

300 LBS	75 FLIGHTS	62 LBS	STRAIGHT
WEIGHT CAPACITY	PER CHARGE	UNIT WEIGHT	STAIR COMPATIBILITY

Straight Staircase Compatibility

Designed specifically for straight staircases and works on wood, carpet, concrete, tile, and most standard indoor and outdoor stair surfaces.

Powered Track Climbing

Motorized traction tracks deliver smooth, controlled ascent and descent on straight staircases, eliminating manual lifting and reducing physical strain for caregivers.

Strong & Practical Performance

Supports users up to 300 lbs and delivers up to 75 flights of stair travel per charge, making it ideal for daily home use, recovery periods, and backup mobility.

Portable & Easy To Store

Folds compactly for storage and transport, fitting into most vehicle trunks for travel, visiting family, or multi-location use.

THE MOBILE STAIRLIFT GENESIS

The Genesis is Mobile Stairlift's flagship portable stairlift, built for users who need maximum safety, capacity, and performance without permanent installation. FDA Registered and engineered for daily use, it delivers powerful, reliable stair travel for home access, recovery, and long-term mobility needs.

Best All-Around Option

400 LBS	120 FLIGHTS	62 LBS	STRAIGHT
WEIGHT CAPACITY	PER CHARGE	UNIT WEIGHT	STAIR COMPATIBILITY

Flagship Portable Design

A full-performance, battery-powered FDA Approved stairlift alternative that delivers premium safety, stability, and control without permanent installation or home modification.

High Capacity & Range

Supports users up to 400 lbs and delivers up to 120 flights of stair travel per charge, making it ideal for frequent daily use and higher weight requirements.

One-Touch Track System

Single push-button track deployment and retraction replaces manual two-bar systems, simplifying setup while reducing physical effort for caregivers.

Smart Safety Engineering

Fully enclosed internal wiring and a rear-mounted, quick-release battery improve reliability, reduce snag risk, and allow convenient on or off unit charging.

THE MOBILE STAIRLIFT LITE

The LITE is designed for users who prioritize portability without sacrificing safety or performance. With a lighter chair weight and long battery range, it is ideal for travel, multi-location use, and caregivers who need easier handling and transport.

Best Lightweight Solution

250 LBS	100 FLIGHTS	44 LBS	STRAIGHT
WEIGHT CAPACITY	PER CHARGE	UNIT WEIGHT	STAIR COMPATIBILITY

Ultra-Lightweight Design

Built with a lightweight frame that makes handling, transport, traveling. and storage easier while still delivering reliable, powered stair travel.

Powered Up & Down Stair Transport

Motorized auto-braking tracks safely carry users up and down straight staircases in a secure seated position, eliminating dangerous manual lifting.

Up To 100 Flights Per Charge

High-efficiency lithium-ion battery delivers long-lasting performance for frequent daily stair use without constant charging.

Auto-Brake & Safety Systems

Features automatic braking tracks, rear wheel foot brakes, safety seat belt, and manual free-wheel mode for emergency operation without battery power.

THE MOBILE STAIRLIFT HELIX

The Helix is the only portable stairlift designed to navigate curved, rounded, and straight staircases. Its adaptive drive system allows smooth, controlled stair travel on complex stair layouts where traditional portable stairlifts cannot operate.

Best for Curved Stairs

400 LBS	120 FLIGHTS	75 LBS	CURVED
WEIGHT CAPACITY	PER CHARGE	UNIT WEIGHT	STAIR COMPATIBILITY

Curved & Straight Stair Compatibility

Designed to safely navigate curved, rounded, and straight staircases, making it the most versatile mobile stairlift option for complex stair layouts.

Motorized Track Control

Powered traction tracks deliver smooth, controlled ascent and descent without manual lifting, improving safety and reducing caregiver strain on challenging stair designs.

High-Capacity Performance

Supports users up to 400 lbs and delivers up to 120 flights of stair travel per charge, providing reliable range and strength for frequent daily use.

Removable Rechargeable Battery

Battery shows real-time charge level on the control panel and can be removed for convenient off-unit charging.

THE MOBILE STAIRLIFT GENESIS FLEX

The Genesis Flex Mobile Stairlift is a true dual-purpose mobility solution designed to function as both a powered stairlift and a transport chair in one system. Unlike every other model in the mobile stairlift category, the Flex features tool-free detachable motorized tracks, allowing it to instantly convert from a powered stair-climbing device into a lightweight transport chair for flat-ground mobility.

Tool-Free Removable Tracks

Best for Multi-Purpose Use

400 LBS	120 FLIGHTS	50 LBS	STRAIGHT
WEIGHT CAPACITY	PER CHARGE	UNIT WEIGHT	STAIR COMPATIBILITY

Dual-Mode Mobility Design

Functions as both a powered mobile stairlift and a transport chair, allowing users to move across flat surfaces and then attach the tracks only when stair travel is needed.

Tool-Free Track Attachment

Tracks attach and detach in seconds without tools, making transitions between transport mode and stairlift mode fast, simple, and physically effortless.

Lightweight Modular Build

Weighs just 50 lbs total, with the chair at approximately 20 lbs and the track assembly at 30 lbs, improving portability, handling, and everyday usability.

Works On Multiple Stair Surfaces

Designed for use on wood, carpet, tile, concrete, and most standard indoor and outdoor stair materials.

ORDERING DETAILS

THE MOBILE STAIRLIFT ATLAS

The Atlas is engineered specifically for wheelchair users who need safe stair access without transferring out of their chair. Designed to accommodate standard and reclining wheelchairs, it provides controlled stair travel for users who require full seated support.

Best for Wheelchairs

440 LBS	120 FLIGHTS	53 LBS	STRAIGHT
WEIGHT CAPACITY	PER CHARGE	UNIT WEIGHT	STAIR COMPATIBILITY

Wheelchair Stairlift Solution

Designed specifically to transport users while seated in their own wheelchair or reclining wheelchair, eliminating transfers before navigating stairs.

Standard & Reclining Chair Compatibility

Accommodates most standard and reclining wheelchairs in 16”, 18”, and 20” seat widths, making it a versatile option for many wheelchair users.

Powered Track Ascent & Descent

Motorized traction tracks provide smooth, controlled movement up and down straight staircases, removing the need for manual lifting or multiple operators.

Safe Wheelchair Securing System

Built-in wheelchair frame clasps, wheel supports, and seatbelt restraints lock the wheelchair into position for s table transport.

MOBILE STAIRLIFT **PROFESSIONAL SERIES**

Tactical Mobility. Professional Performance.

The Mobile Stairlift Professional Series is engineered for the rigors of first response and high-traffic facility management. Designed specifically for EMS, Fire Departments, Police, and Medical Transport teams, these professional-grade evacuation chairs and stairlifts provide the strength and agility required in life-critical situations.

When every second counts, the Professional Series delivers. These units are built with reinforced materials and intuitive controls to ensure a safe, dignified evacuation for the patient and reduced physical strain for the operator. For distributors and fleet providers, this series represents the gold standard in portable transport meeting the high demands of hospitals, schools, and government agencies worldwide.

THE HYPERLITE STAIR CHAIR

Using the latest in high-strength aluminum manufacturing, Hyperlite's classic design is both incredibly durable and extremely lightweight, allowing for optimal portability when it matters.

MOBILE PATIENTLIFT

Mobile Patient Lift | @MobilePatientLift | Mobile Patient Lift | @MobilePatientLift | Mobile Patient Lift

MOBILE PATIENT LIFT

Redefining the Transfer Experience

Mobile Patient Lift is transforming the landscape of patient handling by moving beyond the limitations of traditional equipment. We specialize in sling-free transfer solutions and versatile movement aids designed to make patient handling safer, faster, and more dignified. From assisting with bathroom transfers to providing critical aid for fallen individuals, our equipment is engineered to remove the physical and emotional barriers often associated with patient lifting.

For our providers, the Mobile Patient Lift line represents a modern evolution in home and facility care. Our products prioritize “togetherness” by reducing the mechanical clutter of traditional lifts, allowing caregivers and their loved ones to focus on the person, not the process.

FREEDOM BOOST NO SLING PATIENT LIFT

Perfect for any environment – at home, assisted living or rehab facilities. Unlike tradiitonal patient lifts, the Freedom Boost Patient Lift eliminates the need for an uncomfortable sling using the split seat design which cradles the patient allowing for safe side entry transfer.

Best for Non-Powered Everyday Patient Transfers

265 LBS	70.5 LBS	HYDRAULIC
WEIGHT CAPACITY	UNIT WEIGHT	LIFT SUPPORT

Enclosing Seat

The seat opens 90° and wraps around the patient, making it easy to safely transfer from a seated position to the chair.

Hydraulic Boost Power

Foot-operated hydraulic pump raises and lowers the seat smoothly offering precise control without relying on electrical components.

Locking Wheels

Designed to ensure safety and unwanted movement during transfer into the device, or during transit.

Ergonomic Handles

Comfortable and secure grips make it easy for patients or caregivers to maneuver the lift safely and smoothly.

FREEDOM AQUA ELECTRIC PATIENT LIFT

This innovative chair not only delivers all the trusted benefits of our Freedom Patient Chair but alsobrings the game-changing feature of water resistance. Perfect for shower use, the Freedom Aqua ensures safety, comfort, and reliable support, making every moment worry-free.

Best for Powered Everyday Patient Transfers & Bathing

300 LBS	47 LBS	150 LIFTS
WEIGHT CAPACITY	UNIT WEIGHT	PER CHARGE

Sling Free Transfer Design

Eliminates the need for slings, providing a secure seat that closes around the user instead of lifting them overhead. This reduces stress, improves safety, and enhances confidence during transfers.

Shower Safe IPX5 Water Resistance

The Aqua's IPX5 rating allows safe use in wet environments such as showers and bathing areas without risking electronic or structural damage. It is engineered for water exposure but not full submersion.

90 Degree Split Seat Design

The split seat opens widely so caregivers can easily slide each half under the user with minimal movement. Once secured, the seat provides stability for bathing, toileting, or transport.

Electric Seat Adjustment 19" - 29"

The powered lift aligns the user with bathtubs, shower chairs, and other surfaces to simplify transfers in bathroom environments.

SUPERPI W1 ROLLATOR POWERED WHEELCHAIR

A versatile mobility solution combining a power assist transport chair, rollator, rehabilitation walker, and travel wheelchair in one compact design. The W1 provides powered assistance on inclines, controlled braking on descents, and multiple mobility modes for added independence and caregiver support.

4 IN 1
MOBILITY FUNCTIONS

3.7 MPH
MAX SPEED

6.2 MI
TRAVEL RANGE

Four Mobility Functions

Use it as a power assist transport chair, rollator, rehabilitation walker, or travel wheelchair to adapt to different mobility needs.

Uphill Power Assist

Dual motors provide powered assistance on slopes and inclines, helping maintain a steady speed while reducing the effort required to move the chair.

Controlled Braking

Electromagnetic braking helps control downhill movement and automatically engages when either handle is released for added security and control.

Integrated Control Panel

An easy to access control panel combines the LED display, five speed settings, four operating modes, headlight, USB C charging port, and joystick controls.

VOLTSTAIR
POWERED HAND TRUCK

Voltstair | @Voltstair | Voltstair | Voltstair

VOLTSTAIR

The Future of Powered Material Handling

Voltstair is the industry leader in powered material handling, engineered specifically to tackle the most dangerous task in logistics: moving heavy, bulky equipment across varying elevations. Our mission is to transform a high-risk manual labor task into a controlled, push-button process.

For dealers and distributors, Voltstair represents more than just equipment but also as a critical tool for loss prevention. By automating the ascent and descent of heavy loads, we help businesses significantly reduce Workers' Compensation claims, prevent costly property damage, and improve overall operational efficiency. When you provide Voltstair, you are helping your clients protect their most valuable asset: their people.

THE VOLTSTAIR GO

Made for lighter-weight jobs, the Voltstair GO weighs only 30lbs but lifts up to 250 lbs up or down flights of stairs. It's ideal for moving small to medium-sized boxes and light equipment.

Best for Portability

250 LBS
WEIGHT CAPACITY

30 LBS
UNIT WEIGHT

120 FLIGHTS
& LIGHTWEIGHT

Extremely Portable Lightweight Design

Our lightest model, the GO lives up to its name with the smallest folded size out of the line - only 10" in length. It easily fits into any space, such as cramped closets or tight elevators

Small But Mighty

The 30lbs. GO can lift up to 250lbs. thanks to its powerful motorized anti-slip tracks.

Electronically Controlled Motor

Provides precise control with an electronic brake and speed control for safe navigation on straight stairs.

Ground Level Lifting Platform

Our tapered lifting platform is strong making it easy to wedge beneath boxes and equipment.

THE VOLTSTAIR X-CLIMBER

Designed to do the heavy lifting, the Voltstair X-Climber with X-lifting brace can lift up to 375lbs. up or down a flight of stairs, quickly, easy, and safely.

Best for Curved Stairs

550 LBS
LIFT CAPACITY

61 LBS
UNIT WEIGHT

60 FLIGHTS
PER CHARGE

Two Speed Controls

Find the right speed setting for you. Choose between 24 steps/min or 34 steps/min.

Stair Support Wheels

Compatible for all stair types, including curved staircases. The X-lifting brace can accommodate up to an 8.3" stair step.

Angle Safety Recognition

If the X-Climber is tilted too far (forward, back, left, or right) while climbing, the motor-speed will slow down to help prevent accidents.

Ground Level Lifting Platform

Supports up to 550lbs of weight while also designed to be low to the ground to minimize lifting strain.
